DETAILED ACTION

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract of the disclosure is objected to because the abstract contains the word "means". Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 and 8-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Dehner (US 6,154,884).

In regard to claims 1-6 and 8-11 Dehner discloses a breathable wader (10) with a leg portion (44,46) with a front seam and back seam (48,50) each extending from the front to the back of the garment with a foot covering (60,62); a chest portion (18); a

cinching device being the suspender straps with the suspender adjustment device (not numbered) that cinches the suspenders on the shoulder of the wearer as broadly claimed. The Dehner wader has a pre-curved hip and knee portion as broadly claimed and which are wide enough to fit a shape of a flex knee of the wearer and the hip and wherein the size of the wearer would also affect the fit and flexibility of the garment on the wearer. The seam (40) is "elongated" as broadly claimed. The specifics of the elongation of the back seam in respect to the front seam is not claimed in the above claims. Dehner discloses an adhesive tape sealing means (66). (See Dehner, col. 2, line 17-30; 54-col. 4, line 21).

Claims 7 and 12-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. None of the cited references, alone or in combination, disclose the specific seam structures on the front and rear of the leg portions as claimed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
